

Her Bio reads

Dr. Lichtenberger

thank you for saving  
Mimi she has now  
been adopted

...so very much

Second Hand Purrs.

Hi

I'm the famous Mimi if you have seen our web site you've heard about me. Here is my story. I was left on someone's door step with a note saying I was pregnant and they could not afford to take care of me. So, the good people of Second Hand Purrs took me in. After a couple of days in foster care I looked sick and I had a temp of over 106.1 was rushed to Milwaukee Animal ER and after a lot of expensive testing they found I was not pregnant but had a life threatening infection called Pyometra and had to be spayed right away, but thanks to YOUR generous donations and Second hand Purrs they were able to save my life. The road to recovery was rocky and I had to make several trips back to the ER because of a high temperature (fever) but I'm a fighter and kept up my spirits. Thanks to Dr. Lichtenberger who worked so hard to save my life and never gave up hope. Now I'm well and ready for a new home and I promise to love who ever adopts me.

Mimi
